

GARBAGE CAN ENCLOSURE SPECIFICATIONS

The enclosure must be of the same height and design of our current fencing guidelines. The preferred location is to be on the garage side as far towards the rear of the home as possible. If you have a side garage door it should be between the door and the rear of your home. The enclosure is to be no more than 4' in depth from the home and no more than 6' long. It must be three sided and can have a side or rear swing gate. Posts must be buried 32" and set in concrete.
