

GREYWALL CLUB DETACHED ASSOCIATION  
SOLAR PANEL SPECIFICATIONS

SOLAR PANELS MAY BE PLACED ON A SINGLE FAMILY RESIDENCES PROVIDED:

- Panels must be placed on rear of home only provided that adequate production is achieved. Written confirmation from panel provider/installer must be obtained stating that panels are necessary due to significantly reduced production on the rear of the home only, prior to installation in order to be approved.
- Panels must be as flush with the roof surface as possible. No panels or any other equipment shall break the roof ridgeline.
- All piping from the panels must be painted the same color as the surface upon which they are attached.
- All solar panels shall be commercially/professionally made and installed.
- An architectural application must be submitted for approval prior to installation.

Approved by Board of Directors – February 20, 2019
